Summary:

All Rounded Student at Dubai International Academy in 11C. I speak two languages fluently, one being English and the other being my native language, Arabic. I like to consider myself a jack of all trades, especially in the tech-side of life, since I started actively using some sort of advanced technology/software or another when I was very young. I started learning Adobe Photoshop almost 6 years ago, and I've branched out to Sony Vegas Pro and After Effects meanwhile. The amalgamation of these skills are presented in the educational Youtube videos I produce, as well as my graphic design portfolio as a whole. I later began learning HTML, CSS and then eventually Python, all of which I consider myself at an intermediate level. I am highly proficient in almost all of my subjects, especially Mathematics, Physics & English. I've now been part of the DIAlect school newsletter club for three years, starting off as the lowest position, now reaching President. I thoroughly enjoy journalistic and creative writing. I am also an extremely powerful debater and Model United Nations delegate, achieving 5 best delegates in a row, while participating in 5 conferences. Eventually, I made my way up to my current position, Deputy Secretary General of the Middle East's biggest MUN conference, DIAMUN.

Academic History:

- **2008-2011** - KG 2 - Year 3
